

Ideation Phase

Brainstorm & Idea Prioritization Template

Project Title: Quotes Recommendation Chatbot using NLP

Team ID: (Enter your Team ID)

1. Brainstorming

Brainstorming is the process of generating multiple ideas to solve a problem. For this project, several ideas related to **quotes recommendation and chatbot interaction** were considered.

Generated Ideas

Idea ID Idea Description

- I1A chatbot that recommends motivational quotes based on user mood
- I2A mobile app that sends daily inspirational quotes
- I3A website that categorizes quotes by topic
- I4An AI chatbot that suggests quotes using NLP
- I5A quote generator that creates random quotes

2. Idea Evaluation Criteria

The ideas are evaluated based on the following criteria:

- Innovation
- Feasibility
- User Value
- Technical Complexity
- Market Demand

3. Idea Prioritization Matrix

Idea Innovation Feasibility User Value Market Demand Total Score

I1	High	High	High	High	4
I2	Medium	High	Medium	Medium	3
I3	Low	High	Medium	Medium	2
I4	High	Medium	High	High	4

	Idea	Innovation	Feasibility	User Value	Market Demand	Total Score
I5	Medium	High	Low	Low	2	

4. Selected Idea

After evaluating the ideas, the selected idea is:

AI-based Quotes Recommendation Chatbot using Natural Language Processing (NLP)

5. Reason for Selecting the Idea

The selected idea was chosen because:

- Provides **personalized quote recommendations**
 - Uses **NLP to understand user queries**
 - Offers **interactive chatbot communication**
 - Provides **quick motivational support**
 - More innovative compared to simple quote apps
-

6. Expected Outcome

The final system will:

- Accept **user queries through chatbot**
- Analyze the query using **Natural Language Processing**
- Identify the **user's mood or intent**
- Retrieve **relevant quotes from the dataset**
- Display **recommended quotes instantly**
