Project Name: Quotes Recommendation Chatbot using NLP

Maximum Marks: 4 Marks

Data Flow Diagrams

A **Data Flow Diagram (DFD)** is a graphical representation of the flow of data in a system. It illustrates how data enters the system, how it is processed, and how results are produced.

In the **Quotes Recommendation Chatbot using NLP**, the system processes user queries using NLP techniques and retrieves appropriate quotes from a dataset.

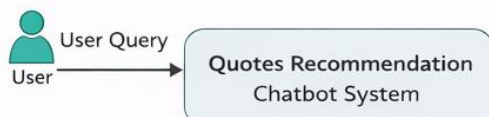

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
User (Web / Mobile)	Chatbot Interaction	USN-1	As a user, I can enter a query to request a quote.	User can type a message and send it to the chatbot.	High	Sprint-1
User	NLP Processing	USN-2	As a user, I want the chatbot to understand my request.	System correctly identifies intent (motivation, love, success, etc.).	High	Sprint-1
User	Quote Recommendation	USN-3	As a user, I want the chatbot to provide relevant quotes.	Chatbot returns an appropriate quote from the dataset.	High	Sprint-1
User	Response Display	USN-4	As a user, I want to see the recommended quote on the screen.	Quote is displayed clearly in the chat interface.	High	Sprint-1
User	Multiple Quote Categories	USN-5	As a user, I want quotes from different categories	Chatbot provides quotes based on	Medium	Sprint-2

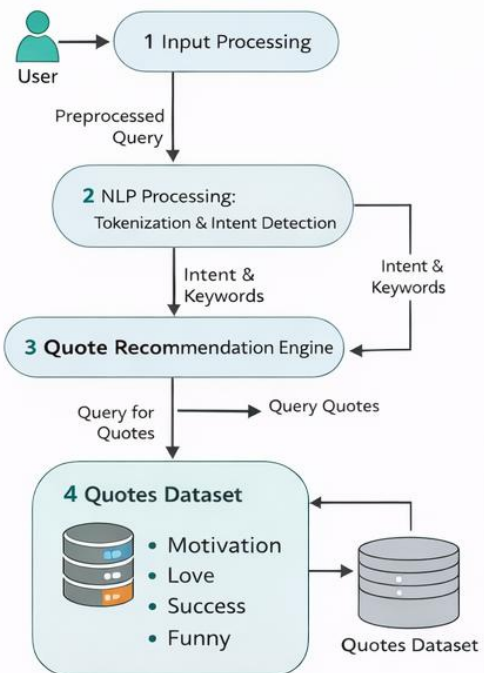

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
			such as motivation, life, or humor.	requested category.		
Administrator	Dataset Management	USN-6	As an admin, I can update or add new quotes to the dataset.	New quotes are stored and accessible to the chatbot.	Medium	Sprint-2
