

Project Design Phase-I – Solution Fit Template

Project Title: Quotes Recommendation Chatbot using NLP

Team ID:

1. CUSTOMER SEGMENTS (CS)

People who want **motivational, inspirational, or emotional quotes** based on their mood or situation.

Target Users:

- Students looking for motivation
 - Social media users searching for quotes
 - Writers or bloggers
 - People seeking emotional support or inspiration
 - Mobile and web users who interact with chatbots
-

2. PROBLEMS (PR)

Users face the following problems:

- Difficult to find **relevant quotes quickly**
 - Searching quotes manually takes **time**
 - Users may not know **which category of quotes fits their mood**
 - Existing quote websites are **not interactive**
 - No **personalized quote recommendations**
-

3. TRIGGERS (TR)

Triggers that motivate users to search for quotes:

- Feeling **sad, stressed, or unmotivated**
 - Preparing **social media posts**
 - Looking for **daily motivation**
 - Reading inspirational content online
 - Chatting with AI assistants
-

4. EMOTIONS (BEFORE / AFTER) (EM)

Before using the system

- Confused
- Demotivated
- Stressed
- Searching for inspiration

After using the chatbot

- Motivated
 - Inspired
 - Positive mindset
 - Emotionally satisfied
-

5. EXISTING ALTERNATIVES (EA)

Current solutions users use:

- Google search for quotes
- Quote websites
- Social media pages
- Mobile apps with static quotes

Limitations:

- No personalization
 - No conversational interaction
 - Hard to filter based on mood
-

6. VALUE PROPOSITION (VP)

The **Quotes Recommendation Chatbot using NLP** provides:

- Instant quote recommendations
- Mood-based suggestions
- Natural language interaction
- Personalized quote results
- Easy and quick user experience

Value:

“Get the right quote for the right moment through an intelligent chatbot.”

7. CUSTOMER BEHAVIOUR (CB)

Users typically:

- Search quotes online
 - Share quotes on social media
 - Save inspirational messages
 - Look for daily motivation
 - Interact with chatbots or AI assistants
-

8. CHANNELS OF BEHAVIOUR (CH)

8.1 Online Channels

- Chatbot web interface
- Mobile application
- Social media integration
- Messaging platforms

8.2 Offline Channels

- Word-of-mouth recommendations
 - Educational presentations
 - Workshops or project demonstrations
-

9. REVENUE STREAMS / BENEFITS (Optional for academic project)

Possible future benefits:

- Advertising in the chatbot
 - Premium quote collections
 - Integration with wellness apps
-

10. YOUR SOLUTION (SL)

The **Quotes Recommendation Chatbot using NLP** is an intelligent chatbot that:

- Accepts **user text queries**
- Uses **Natural Language Processing (NLP)** to understand intent
- Matches user mood with **relevant quote categories**
- Retrieves quotes from a **quotes dataset**

- Displays **personalized quote recommendations**

Main Features:

- Chat interface
- NLP-based query understanding
- Quote recommendation engine
- Category-based quotes (motivation, love, life, success, humor)
- Quick response generation
