User Journey Map

A **User Journey Map** describes the steps a user takes while interacting with the system to achieve a goal. It helps understand the user’s experience, emotions, and actions while using the chatbot.

Stage	User Action	User Thoughts	User Emotion	System Response
1. Discover	User hears about the quotes chatbot or opens the website/app	“I want some motivational quotes.”	Curious	System welcomes the user and provides chat interface
2. Interaction	User enters a message like “I need motivation”	“Will this chatbot give good quotes?”	Interested	Chatbot receives the user query
3. Processing	Chatbot analyzes the message using NLP	—	Neutral	System detects intent and identifies quote category
4. Recommendation	Chatbot retrieves quotes from dataset	“I hope the quote is helpful.”	Expectation	System selects relevant quote
5. Response	Chatbot displays recommended quote	“This quote is inspiring!”	Happy / Motivated	Quote is displayed in chat
6. Continued Use	User asks for more quotes or different category	“Let me see another quote.”	Engaged	Chatbot provides additional quotes
